

Lights Accesories

- Low voltage lighting equates to reducing power costs since they are inexpensive to operate.
- Low heat output allows more flexibility for installation options.
- The lamp cup uses high quality and strengthened glass, surface with static spray paint, small volume, convenient installation, big angle for lighting area, good-looking, dustproof and no creepage.
- This reduces the need to instal additional cooling components.
- These lights are the safest, most efficient, and cost effective artificial lighting sources in the world.
